Product sheet 2016

Topstyle French Fishbone/"Chevron"

Characteristic:

Modern and elegant style of an oak wooden floor, which frequently is used at French city houses. Due to the upright orientation that type of fishbone suits perfectly to modern houses. Beside of the elements with joined in mitre 45°, we offer also the so called „hungarian peak“ with 60° metre (more obtuse angle).

Assortment:

Normally as our standard, we are using the **grading AB**, which means free of knots with only few small sound knots allowed. On special request, we have the chance to use **rift& quarter** elements to achieve strict uprighted elements for special design.

Dimension:

16/4 x 100 x 600 [mm]

As an option, we can manufacture dimensions on special request. The proportion in length to width of 6:1 has stand the test. However, also other proportions can generate effective impressions as well.

Construction: 4mm toplayer above 12 mm birch-plywood.

Surface:

- **Colour:** All existing colours from the Topstyle range
- **Treatment:** standard in brushed surface
Option: sanded surface
