allowed

Product sheet 2016

Topstyle TREND

Characteristic:

Elegant design-elements of a wooden floor, which suits nicely to both small and big rooms. Due to fixed length and width of that element, the floor can be installed either „free“ or very adjusted in an English pattern.

Assortment:

As standard, we manufacture the Topstyle TREND in grading AB, which means mostly free of knots with exceptional few little sound knots.

On special request, we offer the possibility for a grading **Quarter& Rift**, which means aligned texture of each element due to its standing annual grains. This special grading adapts to the modern trend of puristic style in living rooms.

Dimension:

16/4 x 140 x 1.200 [mm]

construction: 4mm toplayer with 12mm birch-plywood

Surface:

- **Colour:** all existing colours from the Topstyle range
- **Treatment:** Standard in brushed surface
Option: in sanded surface

Profile & further information:

- Tongue& groove on 4 sides with microbevel on longside
- Certification according to German emission law (DIBt): Z-156.607-1362
- FSC (as an option): TT-COC-005277
- Fire resistance category according to EN 13501: Dfl-S1
- Thermal resistance R: 0,11 [m² x K/ W]
